Create your eID to become an Alabama State Tax Refund VIP

Alabama Department of Revenue (ADOR) is excited to offer you a valuable tool in the fight against identity theft and tax fraud.

Introducing the MorphoTrust® Electronic ID (eID), the first and only trusted online ID for securing your state tax refunds. The eID ties back to the in-person proofing process the Alabama Law Enforcement Agency (ALEA) conducts when you apply for a driver license or state ID.

With tax refund fraud estimated to reach $21 billion* this year, it is critical to protect yourself.

Tax Refund Fraud is a National Problem

With tax refund fraud continuing to grow at alarming rates, the Alabama Department of Revenue is piloting new technology to protect you from fraud. ADOR is proud to break new ground with their identity solutions partner, MorphoTrust USA, with the nation's first cutting-edge pilot to launch an electronic ID (eID) to secure your state tax refunds.

By securing your Alabama state tax refund with your eID, your tax refund will receive priority processing, making you an Alabama state tax refund VIP.

What is the MorphoTrust® eID?

The MorphoTrust® eID is a digital credential authenticated by state driver license issuing agencies to facilitate secure online transactions.

When you create your eID using the mobile app, your selfie and information is matched against data from Alabama Law Enforcement Agency that is collected when you apply for a driver license or state ID. It brings the trust of your physical driver license or state ID to the online world, allowing you to prove who you are online.

What makes the eID secure?

The eID is secure simply because you and only you can register and use the eID. How is that possible?

1. It ties back to the in-person proofed database record when you applied for your driver license or state ID.
2. The app requires a biometric to open; one of the safest most secure ways to identify yourself, in this case, your selfie.
3. The eID replaces historically weak usernames and passwords.

How will this secure my Alabama state tax refund?

After you've registered your eID with ADOR, when a tax return is filed in your name, you will receive a notification through the eID app prompting you to accept or deny the filing. You – and only you – can approve the processing, mitigating identity theft and tax fraud.
